## Omnisome is opening access for beta users

**Press Release:** On April 10, 2023, Omnisome is opening access for beta users to measure customer satisfaction score and collect customer feedback.

Omnisome is made to work with customer satisfaction and feedback in order to introduce a customer feedback loop. With Omnisome, businesses can easily measure customer satisfaction and collect feedback to provide better customer service and improve their products and services.

Omnisome is focused on offering digital agencies a way to easily measure customer satisfaction score for their client's projects. This will allow agencies to build a new kind of relationship with their clients and use validated data to offer new services and solutions.

"We are excited to launch Omnisome, a new tool that will revolutionize the way businesses collect and analyze customer feedback. "

Some of the key features of Omnisome include:

- Easily collect customer satisfaction score
- Collect customer feedback based on their satisfaction score
- Automatic score calculation
- Customizable and localizable surveys
- Dashboard for data reporting and analysis
- Change management with milestone annotations

Omnisome is available in free and premium versions with free designed to help businesses start collecting feedback and calculating satisfaction score.
